

Cloud vs. On-Premise

SUPPLY

CHAIN

SOLUTIONS

Apples -TO- Apples

Today's consumers shop when, how and wherever they want, making omni-channel fulfillment more important than ever. Ready or not, businesses and their supply chains need to move at the speed of the Internet to keep up.

With fulfillment at the heart of the supply chain, companies need to ensure that their solutions are not bloated, dictated, time-intensive and costly.

After all, one rotten apple can spoil the whole barrel.

**CLOUD
BASED**

**HOW 'BOUT
THESE APPLES?**

**ON
PREMISE**

Multi-tenant
SaaS model
Shared Structure
Internet Access
Secure

No Hardware
No Upfront Licensing Expense
No Annual Maintenance Fees
Reduced Implementation
Free Upgrades

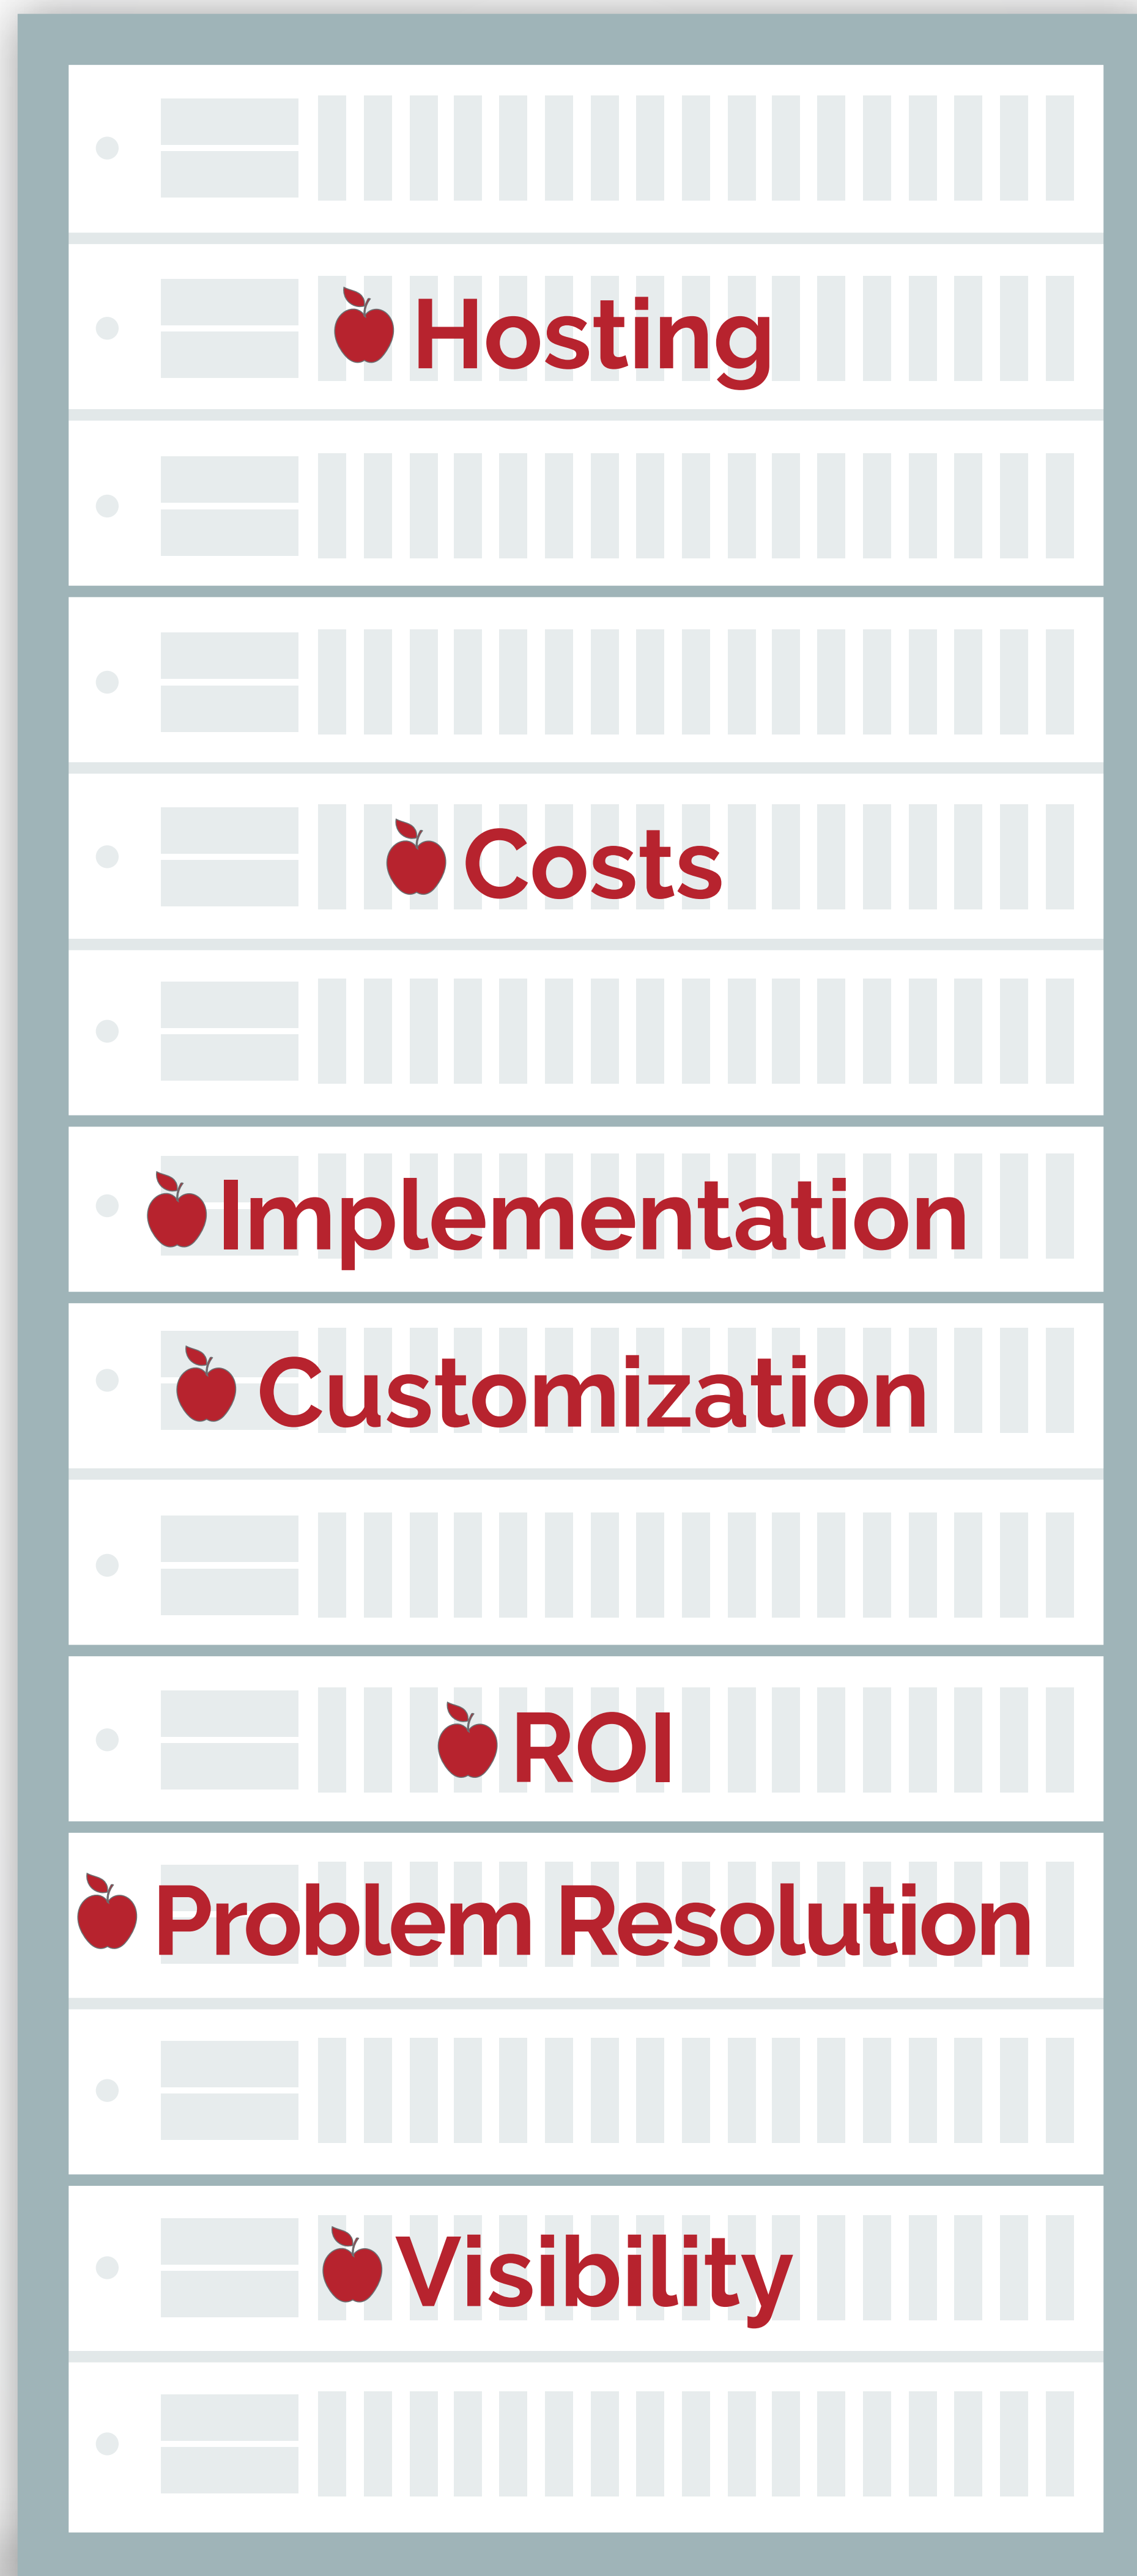

as Few as 90 Days

On-demand

Almost Immediate

Quick
Handled Remotely

Across the Entire Supply Chain
Real-time

Managed In-house
IT Personnel
Highly Customized
High Cost of Maintenance

Upfront Hardware Investment
Multiple Software Licenses
Significant Implementation
Regular, Ongoing Maintenance
Costly Upgrades

Average of 8-12 Months

Built for Specific Time/
Business Need
No Changes Before Upgrades

Takes Years to Materialize

Problem-solving on
Old Software Nonexistent
Requires On-site Visit

Siloed
Latent

A cloud-based supply chain solution allows for enhanced visibility, dynamic replenishment, and unlimited business growth through process automation, cost cutting and increased revenue opportunities.

Is your company ready to become the apple of your competitor's eye?
